Packed unit:

6 PCE

104 PCE

Inner box dimensions: 383x65x460 mm

CARE INSTRUCTIONS

This toilet seat has been made with care and precision using high-quality and environmentally friendly materials. If you follow a few simple cleaning instructions, you will enjoy this quality product for a long time. The closed, nonporous surface provides the best conditions for optimum hygiene. Do not use abrasive, chlorinated or acidic cleaning agents, as these can cause discolouration, paint peeling or flash rust on the hinges. Neutral soap or mild and natural household washing-up liquids are best for thorough cleaning. After cleaning, wipe with a damp cloth. Leave the toilet seat and seat cover up as long as the flushing process continues or as long as there are stronger cleaning agents in the toilet bowl. Thank you for your attention. Enjoy your new toilet seat.
